

ShopRecoveryStuff.com Standard Website Security Policy

To help ensure the security of personal and financial information that you submit through this Website, we use security software to encrypt the information during its transmission. We only allow information to be submitted for transmission if your browser is compatible with our security software. If your browser is not compatible, you will receive a message indicating your transaction cannot be completed because of the security risk.

ShopRecoveryStuff.com uses a secure server and security protocol to safeguard any information you provide. The secure server implements the Secure Socket Layer (SSL) protocol to interact with you when you provide personal information. This technology sends your data through an encrypted tunnel via a High-grade Encryption (AES -256 256 bit) so a third party cannot read the information while in transit. All personal information stored by **ShopRecoveryStuff.com** is housed securely.

We also use JavaScript, so please enable JavaScript in your browser. We only utilize JavaScript to create more dynamic and user-friendly pages.

Email messages are not secure. Our security software does not encrypt email messages. Unencrypted email messages traveling through the Internet are potentially subject to viewing, alteration and copying by others.
